

Carles Gonzalez

Role 3D Character Artist – Specializing in 3D Modelling and Digital Sculpting

Profile Since I was a child I've been passionate about art and creativity.

Movies, such as Tron, Blade Runner, Alien, Terminator, Jurassic Park or Toy Story had a huge impact on my young self and I decided that I wanted to be part of the industry.

I started to learn by my own means pretty soon about art and turned my eyes on 3D, It helped me to have a clear idea of all the technical aspects and the workflow so thanks to that I could start my professional career around 2007, working for advertising studios in Spain, gaining enough experience and skills to start working full-time as a professional in the videogame industry.

Over the last several years I have had the opportunity to work along a good range of projects and challenging experiences, been involved on several AAA videogames, feature films and cinematics.

For the past year I've turned my career into creature design for vfx and films and freelancing opportunities such as toy collectibles and miniatures.
